Description of Business:

Tri-State Utilities services include Pipe Cleaning & CCTV Inspection of Mainlines, Manholes, and Laterals. Digital Scanning and Laser Profiling are the latest enhancements. Tri-State Utilities' Trenchless Pipe Lining, featuring the CIPP Corp. cured-in-place pipe process, equips our crews with the most up to date advances available. Traditional felt CIPP, GRP (Glass Reinforced Pipe), and Non-VOC Liners are all available. Our Liners are VDOT and NCDOT Approved.

In order to perform those services effectively, you need dependable equipment and Tri-States' fleet is modern and state of the art. Our Vactors, CCTV Inspection rigs, boiler trucks, backhoes, and dump trucks are all maintained to maximize production and eliminate costly down time.

Our employees are trained in the latest industry technologies that include PACP, MACP, and LACP Certifications. Tri-State Utilities employs a full time professional safety officer and operates a drug free work force.

Tri-State Utilities earned HRUHCA's Contractor of the Year Award in 2000 and 2008. The Mid-Atlantic Chapter of the APWA Contractor of the Year was awarded to Tri-State in 2013. Tri-State Utilities has also been named CIPP Corp. Contractor of the Year in 2002, 2004, 2005, 2010, 2011, 2012, 2013, and 2014.
