Description of Business:

Earley Marine is a full service Marine Construction Company providing the highest quality construction services. Brian and Barry Earley have over 30 years experience in Marine Construction completing a diversity of commercial construction projects while always maintaining a high standard of excellence, resulting in a proven reputation for quality and value. Some of the work we specialize in includes: diving, building piers/bulkheads, installing pile jackets/timber, fender repair, bridge pile encapsulation, concrete crack and spall repairs and joint sealing. Additionally, EMI has completed numerous contracts in the environmental field, including: stream restoration, building of weirs and other water control structures, stabilizing shore lines, dune restoration, construction risers and outfalls. Earley Marine Inc. is dedicated to completing each project in a timely manner with a satisfied customer while remaining committed to maintaining a safe and quality workforce.
